FDD Abstract of

STATUS OF UNRUH AND LIEBIG'S DELIVERED AND UNDELIVERED 1951 ORDERS FOR REPARATIONS, EXPORTS
AND GDR DOMESTIC USE (14 pp; German; 1951)

25X1X

This 14-page, typewritten, tabular report on the status of 1951 Unruh and Liebig commitments lists delivered and undelivered orders as follows:

I. Reparations (Table headings: Consecutive number; item; reparations number; quantity)

Undelivered orders (2 pp): A total of 95 cranes were outstanding (various types of traveling cranes, revolving railroad cranes, and steel plant cranes).

Completed 1951 reparations shipments (3 pp): sixty 25-ton and twenty-one 50-ton revolving railroad cranes; two plate-straightening machines; and a total of 48 miscellaneous cranes.

II. Exports (Table headings: consecutive number; item; order number; date of order receipt; quantity)

Undelivered orders (1 p): 20 revolving railroad cranes (various types); 1 plate-straightening machine; 107 passenger and freight elevators. The following additional quantities are to be shipped in 1951: 60 electric bridge-cranes and 200 passenger and freight elevators.

Completed 1951 export shipments (1 p): 5 revolving railroad cranes; 1 motor grab; 1 plate-straightening machine; 48 "technological appliances"; 70 passenger and freight elevators. [From the use of the term "Narjad number" for "order number" in the original document it seems probable that the exports are intended for the USSR.]

III. GDR orders (table headings: consecutive number; item; production number; purchaser; quantity)

Undelivered orders (3 pp); various types of cranes and elevators: 48. In addition: two 10-ton cranes; 1 operator's platform; one 40-ton trolley with pit bridge; 3 Ulnogs [sic] and 1 "iron framework."

Completed 1951 GDR shipments (4 pp): various types of cranes: 57; various types of elevators: 30; and 7 other pieces of equipment.
